Frontiers IN Reproduction

April 28 – June 10, 2018 | Application deadline January 18, 2018

COURSE DIRECTOR:

Rafael Fissore, University of Massachusetts, Amherst

This is an intensive, mentored training program in animal and human reproductive biology designed to transmit the latest conceptual advances in the field and provide hands-on experience with techniques used in research labs and in clinics. The ultimate goal is to train the future leaders in the field to improve reproductive outcomes in humans and animals. Topics covered include the hypothalamic-pituitary-gonadal axis; stem cells, gametogenesis and fertilization; assisted reproductive technologies; placentation and implantation strategies across species.

Substantial financial assistance is available.

The MBL is an Affirmative Action/Equal Opportunity/Disabled/Veterans Employer and an affiliate of the University of Chicago.

“FIR allowed me to step out of my comfort zone and enabled me to do research I would have otherwise not had the opportunity to do.” —2016 Alum
