MBL Biological Discovery in Woods Hole

A Nobel Tradition

ANNUAL REPORT 2008

**About the cover:** MBL Distinguished Scientist Osamu Shimomura (left) receives the 2008 Nobel Prize in Chemistry medal from Swedish King Carl XVI Gustaf in Stockholm, on December 10, 2008. Shimomura was awarded the Prize for his discovery of green fluorescent protein, GFP. (Photographer: Erhan Guner. Credit: Fredrik Sandberg/Scanpix/SIPA Press)

The Marine Biological Laboratory does not discriminate in employment or in access to any of its activities or programs or take any retaliatory action on the basis of race, color, religion, sex, sexual orientation, national origin, ancestry, age, participation in a discrimination-related complaint, physical or mental disability, military status or genetic predisposition. In addition, the MBL is committed to the prevention and elimination of sexual harassment, as well as other forms of unlawful harassment, in the workplace. Through training programs and disseminated information, MBL strives to educate its employees, students, faculty, and visitors on these important issues.
