All lectures held in Candle House 105, unless otherwise noted.

**Monday, June 24**
9:00 am   Libusha Kelly  
MIT

Systems and computational approaches to microbial diversity

10:15 am  Dan Buckley  
Cornell University

Stable Isotope Probing

**Tuesday, June 25**
9:00 am   Anton Post  
Marine Biological Laboratory

Marine Cyanobacteria: Nutrient Physiology and Niche Adaptation

10:15 am  Libusha Kelly  
MIT

Cyanophages: nature’s metabolic engineers

**Wednesday, June 26**
9:00 am   Mitch Sogin  
Marine Biological Laboratory

Who are we overlooking in microbial diversity surveys and does it really matter?

10:15 am  Sheri Simmons  
Marine Biological Laboratory

Stochastic variation and selection in plant-associated microbial communities (plus a bit on Woods Hole MTB)

**Thursday, June 27**
9:00 am   Dan Buckley  
Cornell University

Evolutionary Ecology of Streptomyces

10:15 am  Esther Angert  
Cornell University

Evolution of intracellular offspring production in Epulopiscium

**Friday, June 28**
9:00 am   Martin Polz  
MIT

Microbial Population Ecology and Evolution: Part I

10:15 am  Martin Polz  
MIT

Microbial Population Ecology and Evolution: Part II
