Applications Due: March 22, 2021

mbl.edu/SES

(508) 289-7777
ses@mbl.edu

More than fifty colleges and universities have approved the SES for a full semester of academic credit.

Why study at the MBL?

- Gain experience in lab and field research
- To meet inspiring, like-minded students
- To explore how food webs and biodiversity are changing in coastal bays
- To get wet and muddy, have fun, and work hard
- To understand how greenhouse gas emissions are measured in soils and wetlands

Experience life in a world class community of science

Spend your 2021 fall term doing research on ecosystems in wetlands, bays, and coastal forests to deepen your knowledge about global change, and unexpected consequences of human activity on our planet.

“...My fellow SES students and I had so much fun and pushed ourselves to work harder than we ever had before. SES did an amazing job giving us an experience that really teaches what it’s like to be a researcher.”

—Emily Geoghegan, Bryn Mawr College, 2015 Alum
