

Semester in Environmental Science for Undergraduates

IN WOODS HOLE, MASSACHUSETTS

Experience life in a
world class community of science

Spend your 2019 fall term doing research on ecosystems
in wetlands, bays, and coastal forests to deepen your
knowledge about global change, and unexpected
consequences of human activity on our planet.

Why study at the MBL?

Gain experience in lab and field research

To meet inspiring, like-minded students

To explore how food webs and biodiversity are changing in coastal bays

To get wet and muddy, have fun, and work hard

To understand how greenhouse gas emissions are measured in soils and wetlands

Applications Due: March 20, 2019

“My fellow SES students and I had so much fun and pushed ourselves to work harder than we ever had before. SES did an amazing job giving us an experience that really teaches what it’s like to be a researcher.”

—Emily Geoghegan, Bryn Mawr College, 2015 Alum
