Zebrafish Development and Genetics

Marine Biological Laboratory, Woods Hole, MA USA

August 5 - August 19, 2019 | Application Deadline: April 15, 2019

COURSE DIRECTORS:
Sharon Amacher, The Ohio State University
Deborah Yelon, University of California, San Diego

This intensive, hands-on course focuses on molecular, genetic, and imaging methods for using zebrafish as a powerful model system for the study of vertebrate development, regeneration, and disease. A variety of time-proven and emerging zebrafish techniques are covered. The goal is to promote excellence in zebrafish research by creating a collaborative environment that engages students through comprehensive laboratory exercises and interactive discussions overseen by international leaders in the field.

Applications are welcomed from advanced graduate students, postdoctoral fellows, and independent investigators who are incorporating zebrafish into their research and/or teaching.

Applications from underrepresented minorities are especially encouraged.

Substantial financial assistance is available.

The MBL is an Affirmative Action/Equal Opportunity/Disabled/Veterans Employer and an affiliate of the University of Chicago.
